**Subject:** Fund the Mianus River Park Parking Lot Improvement

Dear Ms. Rosenson -

Beyond the suggested boilerplate below, we would like to voice that we believe Mianus Park is Stamford's most precious public treasure and that the town should do all it can to support it as a public resource for the benefit of all its citizens.

Thanks

I am writing to support a proposed parking lot improvement at the Mianus River Park on Merriebrook Lane. The project is listed in the Mayor's March 8, 2014 Proposed Capital Budget for Fiscal Year 2014 - 2015 on page 63, Paving and Drainage/C56169. The parking lot at Mianus River Park on Merriebrook Lane is all dirt that turns to mud after every rain event and discharges dirty water with sediment into the Mianus River, a public water supply for over 100,000 people. There is an intake for the public water supply treatment plant downstream. Additionally, the Mianus River at this location is a trout management stream. The trout habitat requires clear water for their survival. Please let the Board of Representative that they should keep this very important project in the budget.

Tim
