RE: Letter of Support for South End Study Committee

I have been hoping that the South End would be given the same opportunity for protection as do other neighborhoods in Stamford. The prospect of ownership and affordable living and thoughtful changes to go forward and better management of the density. We hope preservation of building style which is an important part of the architectural character of Stamford. Along with beautification to make the South End a quality place for residents to live and not have to worry about losing their homes to demolition and replaced by towering buildings we can not afford to live in.

Since I own my home and live in the South End I support the South End Historic District Study Committee. It is important to formally gather comments and hear the voices of the neighborhood about their property and surroundings for now and years to come.

I would hope the city would agree to this proposal which would benefit the City at large and could preserve some of Stamford's History.

This is just a study request. I sincerely appreciate your consideration.

Regards,

John DaRosa
