Subject to the qualifications and limitations stated in Section 1 of this report, TRC Environmental Corporation (TRC) was retained by the City of Stamford (also known as "Client" or "User" to perform a Phase I Environmental Site Assessment (ESA) of the property located at 156 Greenwich Avenue in Stamford, Fairfield County, Connecticut (herein referred to as the "Site"). TRC's assessment was conducted in connection with the Client's planned redevelopment of the Site. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the American Society of Testing and Materials Practice E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13). Limiting conditions and/or deviations from the ASTM E 1527-13 standard are described in Sections 1.3 and 7.7 of this report.

The approximately 0.14-acre Site is located at 156 Greenwich Avenue, Fairfield County, Stamford, Connecticut in a mixed commercial /residential area. The Site is described by the City of Stamford Tax Assessor as Map 127, Block 18, Lot A and is zoned as multiple family medium density design or R5, and is currently owned by Empire State Realty Trust (ESRT) First Stamford Place SPE LLC. The Site is currently utilized as a small park with walkways and a sitting areas. Site location map is included as **Figure 1**.

As a result of the Phase I ESA, including but not limited to our visual observation of the Site; review of historical information, environmental databases, and information provided by the User; interviews with current Site representative(s); and TRC's professional judgment, no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs) associated with the Site, as defined by the ASTM E 1527-13 standard were identified.

This Executive Summary is part of this complete report; any findings, opinions or conclusions in this Executive Summary are made in context with the complete report. TRC recommends that the User read the entire report for all supporting information related to findings, opinions and conclusions.

Legal Notice

This document was prepared by TRC solely for the benefit of the User. With regard to third-party recipients of this document, neither TRC, nor the Client, nor the User, nor any of their respective parents, affiliates or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document; or (b) assumes any liability with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Client, the User, and their parents, affiliates and subsidiaries, from any liability for direct, indirect, economic, incidental, consequential or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

1.0 INTRODUCTION

TRC Environmental Corporation (TRC) has prepared this Phase I Environmental Site Assessment (ESA) for the City of Stamford (hereinafter "Client" or "User").

This report was prepared for and may be relied upon by Client for the purposes set forth herein; it may not be relied on by any party other than the Client and reliance may not be assigned without the express approval of TRC. Authorization for third party reliance on this report will be considered by TRC if requested by the Client. TRC reserves the right to deny reliance on this report by third parties.

1.1 Purpose and Scope of Services

The following Phase I ESA was performed for the property located at 156 Greenwich Avenue, Stamford, Fairfield County, Connecticut (hereinafter the "Site"). A Site location map is included as Figure 1. This Phase I ESA has been prepared by TRC in accordance with the American Society for Testing and Materials E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13) and is intended for the sole use of the City of Stamford.

The purpose of this assessment is to identify *Recognized Environmental Conditions* (RECs) at the Site, as defined by the ASTM E 1527-13 standard. The completion of this Phase I ESA report may be used to satisfy one of the requirements for the User to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), thereby constituting *all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice* as defined by 42 U.S.C. §9601(35)(B) of CERCLA.

The Scope of Services for this Phase I ESA included the following tasks:

- Site and vicinity reconnaissance;
- Site and vicinity description and physical setting;
- Historical source review and description of historical Site conditions;
- Interviews with owners, operators, and/or occupants of the Site, and/or local officials;
- Review of environmental databases and regulatory agency records;
- Review of previous environmental reports/documentation, as applicable;
- Review of environmental liens, if provided or authorized to obtain by the User; and
- Preparation of a report summarizing findings, opinions and conclusions.

Pursuant to the ASTM E 1527-13 standard, recommendations to conduct Phase II sampling or other assessment activities are not required to be included in this report.

1.2 Additional Services

Items outside the scope of the ASTM E 1527-13 standard include, but are not limited to, the following:

- Asbestos-containing building materials
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historic resources
- Industrial hygiene

- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to *releases* of *hazardous substances* or *petroleum products* into the environment
- Biological agents
- Mold

No additional services were performed outside the scope of the ASTM E 1527-13 standard.

1.3 Deviations to ASTM E 1527-13 Standard

Notwithstanding additions to the ASTM E 1527-13 standard, as listed in Sections 1.2 and 9, if applicable, no significant deviations or deletions to the ASTM standard were made during this Phase I ESA.

3

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The approximately 0.14-acre Site is located at 156 Greenwich Avenue, Fairfield County, Stamford, Connecticut in a mixed commercial /residential area. The Site is described by the City of Stamford Tax Assessor as Map 127, Block 18, Lot A and is zoned as multiple family medium density design or R5, and is currently owned by Empire State Realty Trust (ESRT) First Stamford Place SPE LLC. Note that this Site is identified by the City of Stamford Tax Assessor to be the same Map/Block/Lot as 180 Greenwich Avenue Lot A. Site location map is included as **Figure 1**.

2.2 Site Description

The Site is a small park-like setting located on the corner of South State Street and Greenwich Avenue. The area is currently comprised of concrete walking paths as well as several benches. The majority of the Site is comprised of grass lawn as well as several small landscaped areas. The Site is bordered to the north by South State Street, to the south by the Czescik Homes (currently vacant), to the east by the Rippowam River and to the west by Greenwich Avenue.

2.3 Site Improvements

Current on-site improvements are listed in the following table. A Site layout plan is included as **Figure 2**.

Site Feature Description Buildings (stories) There are currently no buildings located on the Site. Construction date(s) The Site is comprised of lawn and landscaped areas as well as a concrete Exterior areas walking path and sitting area. There are no rail lines located on the Site, however, an railroad overpass On-site roads/rail lines boarders the southern portion of the Site. Other large equipment N/A Potable water supply Although not connected, public water is available in the area of the Site. Although not connected, municipal sewer is available in the area of the Sewage disposal system(s) Site. Heating/Cooling system fuel N/A source(s) Back-up fuel source(s) Although not connected, electricity provided by Eversource is available in Electricity supplier(s) the area of the Site. Municipal Storm water system

Table 2.1 - Site Improvements

2.4 Current and Historical Site Use

2.4.1 Current Site Use(s)

The approximately 0.14-acre Site is currently operated as a small park and sitting area.

2.4.2 Previous Owner and Operator Information

Based on information provided by the User (Section 3), the historical record review (Section 4), and/or interviews conducted during this Phase I (Section 6), historical Site ownership and operator information is provided in the tables below.

 Site Owner

 ERST First Stamford Place SPE LLC
 10/10/2013
 Present

Table 2.3 - Previous Owner Information

The Site appears to have been used as a park-like setting since the early 1980s prior to which it was developed with a building that operated as a restaurant.

2.5 Physical Setting

According to the United States Geological Survey (USGS) topographic map, Stamford, Connecticut quadrangle dated 2012 (Figure 1), the Site abuts the west branch of the Rippowam River to the east, the Site topographic elevation is approximately 18-feet above mean sea level (MSL), and local topography slopes to the east. The topographic downward slope observed at the Site during the Site reconnaissance is generally towards the east. Based on local topography and historical environmental reports provided to TRC, as applicable, the assumed direction of shallow ground water flow is to the east, towards the Rippowam River. However, a subsurface investigation would be required to determine actual ground water flow direction.

The database radius report supplied by Environmental Data Resources, Inc. (EDR) of Milford, Connecticut was reviewed to obtain information regarding the dominant soil composition in the Site vicinity. This information is summarized below:

Hydric Status: Unknown
Soil Surface Texture: Material
Soil Component Name: Urban Land
Deeper Soil Types: Unknown

Please refer to the Geocheck Physical Setting Source Summary of the EDR report presented in **Appendix A** for further information regarding the soil composition in the Site vicinity.

According to EDR, the eastern and southern portions of the Site are located in FEMA flood zone AE which is an area that has a 1% annual chance of a base flood.

3.0 USER PROVIDED INFORMATION

According to the ASTM E 1527-13 standard, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User. These tasks include: providing, or authorizing the *environmental professional* to obtain, recorded land title records for environmental liens or activity and land use limitations (AULs); providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); providing commonly known or *reasonably ascertainable* information within the local community about the *property* that is material to RECs in connection with the *property*; and informing the *environmental professional* if, as believed by the User, the purchase price of the *property* is lower than the fair market value due to contamination. A list of requested information was included in TRC's signed proposal (see Section 1.1). Information provided by the User pursuant to that request is listed in Section 8.0.

3.1 Title & Judicial Records for Environmental Liens or Activity and Use Limitations

In addition to reviewing the EDR report (discussed in Section 4.2), local municipal records (Section 4.4), and the Connecticut Department of Energy and Environmental Protection (CT DEEP) environmental records (Section 4.4), TRC obtained supplemental information regarding AUL-listed properties within the City of Stamford from the City Clerk. No evidence of AULs associated with the Site was identified.

3.2 Specialized Knowledge

The User was not aware of specialized knowledge related to RECs at the Site.

3.3 Property Value Reduction Issues

The User was not aware of property valuation reduction issues regarding the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

TRC was supplied with commonly known and/or reasonably ascertainable information regarding the Site by the City of Stamford. This information was used during this Phase I ESA and has been incorporated in this report as applicable.

3.5 Reason for Conducting Phase I

It is TRC's understanding that the User requires a Phase I for the requisition and redevelopment of the Site.

4.0 RECORDS REVIEW

4.1 Historical Use Information

Information regarding Site and vicinity historical uses was obtained from various publicly available and practically reviewable sources including:

- Aerial photographs (scale: 1" = 500) dated 1934, 1949, 1951, 1960, 1963, 1979, 1985, 1990, 1991, 1996, 2005, 2006, 2008, 2010 and 2012;
- Sanborn fire insurance maps dated 1892, 1896, 1901, 1929, 1951 and 1981;
- Topographic maps dated 1892, 1893, 1899, 1951, 1960, 1984, 1987 and 2012;
- City directories dated 1961, 1966, 1971, 1976, 1988, 1992, 1995, 1999, 2003, 2008 and 2013;
- Local municipal records;
- An environmental database report; and
- Interviews with Site representative(s) and regulatory agency official(s), as necessary.

Historical research documentation is included in **Appendix B**.

4.1.1 Site History

Operational History

Table 4.1 - Site History

Year	Site History		
1892 – 1951	The Site appears to consist of vacant land.		
1951 – 1985	The Site appears to be developed with a building on the southern portion of the property. The 1981 Sanborn Map identifies the building as a restaurant. In addition, the historical city directories dated between 1961 and 1976 identify the property as the Rippowam Grill or Diner.		
1985 – Present	The Site appears to be a small park-like setting with walkways and sitting areas.		

It appears that the elevation contours in the area of the Site were altered between the late 1800s and the 1950s indicating that the land in this area had been regraded. In addition, topographic

maps provided between the years of 1951 and 2012 indicate that the Site is located in a densely populated area.

Hazardous Substances

Hazardous substances including raw materials; finished products and formulations; hazardous wastes; hazardous constituents and pollutants including intermediates and byproducts were not historically located on the Site.

4.1.2 Adjoining Property History

Table 4.2 - Adjoining Property History

Year	Adjoining Property History		
North	Historically the Site has been adjoined to the north by a road that has been listed as McCullough Street and as South State Street beyond which were individual residential dwellings prior to the mid-1960s when the Czescik Homes, a residential housing complex was constructed.		
East	The west branch of the Rippowam River has historically adjoined the Site to the east.		
South	Historically the Site has been adjoined to the south by individual residential dwellings prior to the mid-1960s when the Czescik Homes, a residential housing complex was constructed. In addition, a railroad overpass is located just south of the property.		
West	Greenwich Avenue adjoins the Site to the east beyond which residential properties have been located.		

4.1.3 Surrounding Property History

Table 4.3 - Surrounding Property History

Year	Surrounding Property History		
North	The surrounding area located to the north of the Site appears to have been historically developed by residential and commercial properties from the early 1900s through the present.		
East	The Rippowam River abuts the Site to the east. Prior to the 1960s, the area located to the east beyond the river was occupied with what appear to be residential properties. The 1960 aerial photograph suggests that the area to the east of the river is developed by a commercial property. In the early 2000s, the property located to the east of the Site was redeveloped into what appears to be a more modern commercial building.		
West	The surrounding area located to the west of the Site appears to have been historic developed by residential properties through the 1960s after which, several comme properties appear to be present.		
South	The area located to the south of the Site has been developed by residential properties since the late 1800s.		

4.2 Database Report & Environmental Record Review

A database search report that identifies properties listed on state and federal databases within the ASTM-required radii of the Site was obtained from EDR and is included in **Appendix A**.

The environmental database report identified 212 properties/listings including surrounding properties. These properties included those that could be mapped and those that could not (i.e., orphan properties). The Site and/or the adjoining properties were not listed in the database search report.

4.2.1 Subject Site

The Site was not identified by EDR to be reported in any local, state or federal environmental databases.

4.2.2 Adjoining & Surrounding Property Record Review

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

- (1) Whether the property is up-gradient or down-gradient of the Site vis-à-vis **ground water migration** based on the local topography, and the assumed ground water depth and easterly shallow ground water flow direction;
- (2) Whether the property is up-gradient or down-gradient of the Site vis-à-vis **vapor migration** based on readily available information pursuant to the ASTM E 1527-13 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as Karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits):
- (3) Property case status (i.e., whether the CT DEEP has issued a No Further Action letter;
- (4) Type of database and whether the presence of contamination is known; and
- (5) The distance between the listed property and the Site.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below, since the potential for contamination to be migrating to the Site from the other properties identified by the database search is considered low.

4.2.2.1 Adjoining Properties

According to EDR, none of the Site's adjoining properties were identified to be reported in any local, state or federal environmental databases.

4.2.2.2 Surrounding Properties

Surrounding property information included in the database search report is summarized in the following table(s):

Facility Name(s) and/or Address(es)	Beckley Cleaners, 61-65 Richmond Hill Avenue, Stamford, CT		
Approximate Location Relative to Site	0.045-miles north at a lower elevation than the Site.		
EDR Map No(s).	D19		
Database(s)	CT SDADB and CT CPCS		
Presumed Hydrogeologic Setting	Cross-gradient		
Database Review Summary	This Site is identified by EDR as having entered into the CT DEEP Property Transfer Program in August 1998. Both chlorinated volatile organic compounds (VOCs) and hydraulic oil are reported to have been the contaminants of concern at this property, however, EDR reports that the remediation of this site was verified by an LEP and approved by CT DEEP in 1998. It is unlikely that environmental issues from this property would have an impact on the Site.		

Facility Name(s) and/or Address(es)	Former Gasoline Station, 63 Richmond Hill Road, Stamford, CT		
Approximate Location Relative to Site	0.047-miles north at a lower elevation than the Site		
EDR Map No(s).	D21 and D22		
Database(s)	CT UST, LUST		
Presumed Hydrogeologic Setting	Cross-gradient		
Database Review Summary	EDR reports two 2,000-gallon gasoline USTs were located on this property. It is reported that the USTs were removed from the ground, however, there is no reported information on the date of installation or removal. This property is also identified in the LUST database indicating that there was some amount of leakage associated with the former gasoline tanks. The status reported for this property is LUST completed. This property is unlikely to have an environmental impact on the Site.		

Facility Name(s) and/or Address(es)	300 Stamford Place, Stamford, CT	
Approximate Location Relative to Site	0.058-miles northwest at a higher elevation than the Site	
EDR Map No(s).	E24 and E25	
Database(s)	EDR Hist. Auto	
Presumed Hydrogeologic Setting	Up-gradient	
Database Review Summary	EDR reports that an automotive company named Successful Car Center was located on this property in 1999 and 2000. This property is unlikely to have an environmental impact on the Site.	

4.3 Previous Reports

No previous environmental reports were identified to be associated with the subject property.

4.4 Other Environmental Record Sources

Per the ASTM standard, local or additional state records were reviewed to enhance and supplement the ASTM-required federal and state records reviewed and discussed earlier in this report. These additional records include state agency lists of: waste disposal facilities; brownfield properties; hazardous waste/contaminated facilities; registered storage tanks; records of emergency release reports; and records of contaminated public wells. Local sources that were contacted to obtain this information include: Department Environmental Division; Fire Department; Planning Department; Building Department and City Clerk for land records (for AULs). Information from these sources is discussed below:

Table 4.4 - Other Environmental Record Sources

MUNICIPAL/STATE REGULATORY AGENCY/ DEPARTMENT	Available Information		
Environmental Protection Board	TRC visited the City of Stamford Environmental Protection Board (EPB) on Monday April 17, 2017. The EPB was able to confirm that the Site is located in FEMA flood zone AE.		
Fire Marshal	A request for environmental and/or UST files was submitted to the City of Stamford fire marshal's office on April 18, 2017. TRC has yet to be contacted by the Fire Marshal with any pertinent information regarding the Site.		
Planning/Zoning Department	TRC visited the Planning and Zoning Department on April 17, 2017. The department was able to confirm that the Site is located in an area zoned as R5 or multiple family medium density design.		
Building Department	A request for files was submitted to the Building Department on April 17, 2017. TRC has yet to receive any information pertaining to the Site form this department.		
City Clerk	TRC visited the City of Stamford Town Clerk on April 17, 2017. The City Clerk's office provided TRC with a chain of ownership for the property.		

MUNICIPAL/STATE
REGULATORY
AGENCY/ DEPARTMENT

Prior to the commencement of the Phase I ESA, the Engineering Department was able to provide TRC with a Historic Sanborn Map as well as several figures showing the building layout. On April 17, 2017, TRC visited the engineering

office in an attempt to identify any additional information pertaining to the Site. The Engineering Department informed TRC that we were provided all of the

TRC visited the CT DEEP on April 19, 2017 in an attempt to obtain environmental records pertaining to the Site. TRC requested to review UST, manifest, remediation, hazardous waste, storm water, solid waste, oil and

chemical spill, permits, notice of violation and permitting files associated with the Site. No files were identified by CT DEEP file room staff pertaining to the Site.

Table 4.4 - Other Environmental Record Sources

5.0 SITE RECONNAISSANCE

information available in their files.

5.1 Methodology and Limiting Conditions

CT DEEP

Ms. Kate Sheffield, conducted a Site reconnaissance of accessible areas on and around the Site on April 17, 2017 for the purpose of identifying potential RECs, and was accompanied by Richard Zurkowski, the Clerk of Work for the City of Stamford Engineering Department, who provided access to the property and answered questions during the reconnaissance. Photographs taken during the reconnaissance are provided in Appendix C. A Site layout plan is included as Figure 2.

5.2 Interior and Exterior Site Observations

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration or a discharge of hazardous materials; and there are no records of a release in these areas. Items where further description is warranted are discussed in the section(s) following the table.

Item	Present (Current/ Historic)	Description
Hazardous material storage or handling areas	No/No	(see Section 5.2.1)
Aboveground storage tanks (ASTs) and associated piping	No/Unknown	Although there were no records obtained indicating the presence of ASTs on the Site, it is possible that the former restaurant located on the property utilized an AST.

Table 5.1 - Interior and Exterior Site Observations

Table 5.1 - Interior and Exterior Site Observations

Item	Present (Current/ Historic)	Description
Underground storage tanks (USTs) and associated piping	No/No	Although there were no records obtained indicating the presence of USTs on the Site, it is possible that the former restaurant located on the property utilized a USTs to store heating oil.
Drums & containers (≥5 gallons)	No/No	
Odors	No/No	
Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only)	No/No	
Polychlorinated Biphenyls (PCBs) / Transformers	No/No	
Stains or corrosion	No/No	
Drains & sumps	No/Unknown	
Pits, ponds & lagoons	No/No	
Stressed vegetation	No/No	
Historic fill or any other fill material	No/No	
Wastewater (including storm water or any discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site)	No/No	
Wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells) Septic systems or cesspools	No/No No/Unknown	

5.2.1 Hazardous Substances

There were no hazardous substances including raw materials; finished products and formulations; hazardous wastes; hazardous constituents and pollutants including intermediates and byproducts currently present at the Site.

5.2.2 Underground Storage Tanks

Records obtained from the CT DEEP and the EDR records review indicate that there are no USTs currently located on the property. A request for UST files has been submitted to the City of Stamford Fire Marshal, however, TRC has yet to receive any information pertaining to the Site. In addition, no evidence of the presence of a UST was observed on the day of the Site reconnaissance.

5.2.3 Aboveground Storage Tanks

No ASTs were observed to be present at the Site on the day of the Site reconnaissance, nor were any records available indicating the presence of ASTs being historically present at the Site.

5.3 **Adjoining and Surrounding Properties Reconnaissance**

5.3.1 Adjoining Properties

North

East

South

West

During the Site reconnaissance, TRC viewed the adjoining properties from the Site and publicly accessible areas (e.g., public roadways, etc.).

Direction **Current Land Use Description** from Site The Site is adjoined to the north by South State Street, beyond which is a small park and the former Czescik Homes residential living complex. In addition, an Interstate 95 overpass is located to the north of the Site.

The Site is adjoined to the east by the west branch of the Rippowam River, beyond which are located

The Site is adjoined to the south by a railroad overpass, beyond which is a former residential housing

The Site is adjoined to the west by Greenwich Avenue, beyond which are residential and commercial

Table 5.2 - Adjoining Properties Reconnaissance

Surrounding Properties 5.3.2

properties.

commercial properties.

complex (Czescik Homes).

Surrounding properties generally include mixed commercial/residential to the north, south, east and west.

6.0 INTERVIEWS

The following persons were interviewed to obtain historically and/or environmentally-pertinent information regarding RECs associated with the Site.

Richard Zurkowski – City of Stamford Engineering Department – Clerk of Works

The information provided by each is discussed and referenced in the text and provided below. Other references and sources of information are included in **Appendix E**.

FINDINGS, OPINIONS AND CONCLUSIONS 7.0

Potential findings can include RECs, historical RECs (HRECs), controlled RECs (CRECs) and de minimis conditions, pursuant to the ASTM E 1527-13 standard.

RECs are defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions

indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*.

CRECs are defined as a REC resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations, institutional controls*, or *engineering controls*).

HRECs are defined as a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations, institutional controls*, or *engineering controls*).

De minimis conditions are defined as a condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not RECs nor CRECs.

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13 at the property located at **156 Greenwich Avenue**, **Stamford**, **Connecticut** (Site), see **Appendices E and F**. Deviations from this standard are described in Sections 1.3 and 7.6 of this report.

7.1 RECs and CRECs

This assessment has revealed no evidence of RECs (including CRECs) in connection with the Site.

7.2 HRECs

This assessment has revealed no evidence of HRECs in connection with the Site.

7.3 De Minimis Conditions

This assessment has revealed no evidence of *de minimis* conditions in connection with the Site.

7.4 Data Gaps

TRC has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historical ownership and use of the Site back to the first development per 40 CFR Part 312.24 (*Reviews of Historical Sources of Information*). Data gaps identified during this assessment include the following:

276017,0000,0000 15

- 1. Due to lack of records, it is unclear the type of fuel source utilized by the former restaurant and if the fuel source required an AST or UST for storage.
- 2. It is unknown if the Site ever utilized a septic system.

Based on historical sources reviewed, Data Gap Nos. 1-2 are not considered *significant*.

7.5 Other Noteworthy Issues

This assessment has revealed no evidence of other noteworthy issues that warrant further discussion in this Section.

7.6 Limiting Conditions and Deviations

7.6.1 Accuracy and Completeness

The ASTM E 1527-13 standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- Uncertainty Not Eliminated No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 7.5.
- Not Exhaustive A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property A review of standard historical sources at intervals less than five years is not required.

The Client is advised that the Phase I ESA conducted at the Site is a <u>limited inquiry</u> into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the Site. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific use; ii) that the Site is free of RECs or environmental impairment; iii) that the Site is "clean"; or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM standard and intended scope of this assessment. Specific limiting conditions identified during the Site reconnaissance are described in Section 5.1. Subsurface conditions may differ from the conditions implied by surface observations, and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's site reconnaissance observations, findings, and conclusions as they existed at the time of the Site reconnaissance. TRC makes no representation or warranty that the

past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed Site conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

7.6.2 Warranties and Representations

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the client-provided addresses and/or legal parcel description; or (4) information regarding off-site location(s) (with possible impact to the Site) not published in publicly available records.

7.6.3 Continued Validity/User Reliance

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in the ASTM E 1527-13 standard, for a period of 180 days from completion, or until the Client obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Client is notified by TRC that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report. Additionally, pursuant to the ASTM E 1527-13 standard, this report is presumed valid if completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

7.6.4 Significant Assumptions

During this Phase I ESA, TRC relied on database information; interviews with Site representatives, regulatory officials, and other individuals having knowledge of Site operations; and information provided by the User as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/10/2016 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
STAMFORD NATURAL GAS	32 WASHINGTON BOULEV	SSE 1/4 - 1/2 (0.334 mi.)	X146	502

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/10/2016 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there are 4 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/12/2016 has revealed that there are

2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SOUTH END FIRE STATI	215 WASHINGTON BOULE	SE 1/8 - 1/4 (0.190 mi.)	L76	221

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CT SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection's Inventory of Hazardous Disposal Sites.

A review of the CT SHWS list, as provided by EDR, and dated 04/23/2010 has revealed that there are 7 CT SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CT SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Inventory of Hazardous Disposal Sites.

A review of the CT SWF/LF list, as provided by EDR, and dated 12/16/2016 has revealed that there is 1 CT SWF/LF site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program,

which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 03/02/2017 has revealed that there are 2 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 15 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CT CPCS: A list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). The list contains the following types of sites: Sites listed on the Inventory of Hazardous Waste Disposal Sites; Sites subject to the Property Transfer Act; Sites at which underground storage tanks are known to have leaked; Sites at which hazardous waste subject to the RCRA; Sites that are included in EPA's (CERCLIS); Sites that are the subject of an order issued by the Commissioner of DEP that requires investigation and remediation of a potential or known source of pollution; and Sites that have entered into one of the Department's Voluntary Remediation Programs.

A review of the CT CPCS list, as provided by EDR, and dated 03/15/2017 has revealed that there are 51 CT CPCS sites within approximately 0.5 miles of the target property.

CT SEH: The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

A review of the CT SEH list, as provided by EDR, and dated 09/30/2016 has revealed that there are 4 CT SEH sites within approximately 0.5 miles of the target property.

FUELS PROGRAM: This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.

A review of the FUELS PROGRAM list, as provided by EDR, and dated 11/21/2016 has revealed that there is 1 FUELS PROGRAM site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

STAMFORD GAS LIGHT C	PACIFIC STREET	ENE 1/4 - 1/2 (0.476 mi.)	AN195	701

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

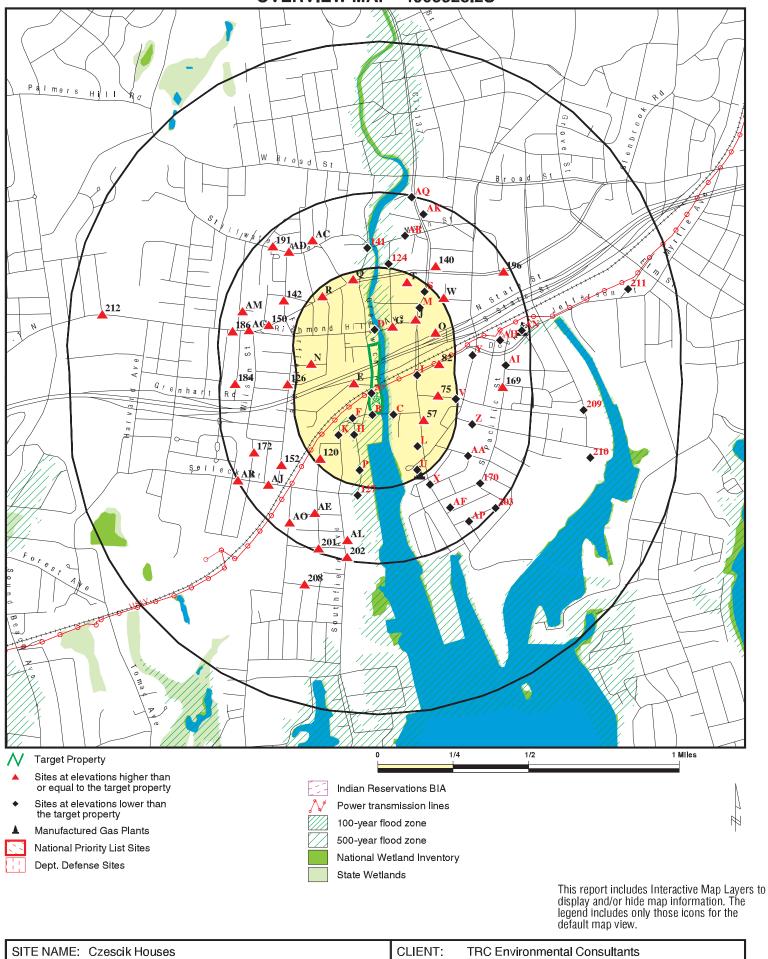

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AIR MINOR

Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Comments: Not reported

SEH:

Date Notified: 05/02/2008

Type Of Hazard: Pollution in the top two feet of soi may pose a risk to human health

as a result of direct contact.

Response: DEP reviewed information provided and established that the polluted

soil is in a secure and fenced area, limiting the potential for

contact. DEP requested this security be maintained, and a report be

submitted when planned remediation is completed.

Actions: No direct exposure pathway to polluted soil exists, and this security

will be maintained until site is remediated. Remediation will be completed during re-development activities proposed for the site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

Property Transfer Forms: Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled

loss, seepage or filtration of hazardous waste has occurred at the parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III

certification agrees to investigate and remediate the site in accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a completed Environmental Condition Assessment Form

(ECAF)(DEP-PERD-PTP-200).

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

NOV Comments: Not reported

Release Desc: On 2/5/04 OCSRD recvd a phone call reporting the presence of what

appeared to be fuel oil in the West Mill River. Red oil observed at the base of a storm drain outfall located just north of the Tresser Blvd. Bridge. Mr. Aceto identified several possible source areas and requested technical assistance from the LUST program to perform a limited subsurface investigation at one of the likely sources #35 Clinton Ave. This property was considered because their HF transfer

line is partially encapsulated by concrete.

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001

Waste name: IGNITABLE WASTE

. Waste code: D002

. Waste name: CORROSIVE WASTE

Waste code: D003

. Waste name: REACTIVE WASTE

. Waste code: D006 . Waste name: CADMIUM

Waste code: D007

Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: F001

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED

IN F002, F004, AND F005: AND STILL BOTTOMS FROM THE RECOVERY OF THESE

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE,

CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2,

TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

SPENT SOLVENT MIXTURES.

Waste code: F005

Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F006

. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT

FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM;

Distance Elevation

Site Database(s) EPA ID Number

PITNEY BOWES, INC (Continued)

SEH:

Response:

Date Notified: 12/16/1998

Type Of Hazard: Pollution in the top two feet of soil may pose a risk to human health

as a result of direct contact.; Pollution detected in groundwater that discharges to a surface water body may pose a risk to aquatic life. No immediate action required because site access is controlled,

limiting potential soil direct contact and sitespecific dilution calculation indicates there is no acute aquatic toxicity. DEP requested a plan to monitor the reported contamination.

Actions: Site specific dilution factor and groundwater results indicate that

groundwater pollution does not significantly impact surface

water/aquatic life. Hazardous soil rendered inaccessible and isolated

beneath building. No further abatement necessary.

FINDS:

Registry ID: 110003007567

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SUPERFUND (NON-NPL)

Registry ID: 110011557528

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

SEH: Relative:

Date Notified: Lower

Type Of Hazard: Pollution detected in groundwaterabove standards may threaten a

Actual: drinking water well.; Pollution detected in groundwater that 9 ft.

discharges to a surface water body may pose a risk to aquatic life.

DEEP reviewed the well receptor survey information and determined that Response: supply wells are not located in the area and directed the property

owner to investigate the extent and degree of groundwater pollution to

evaluate the threat to surface water.

Actions: No wells were found to be within 500 feet of the groundwater

> pollution; groundwater threat to surface water evaluated for site-specific conditions and determined to not significantly impact

surface water body or aquatic life.

Running Comments: Spill Report ID: 91-228The 1/23/91 report mentions the removal of 3-3k gasoline USTs by Kelsey Paving. Due to the incomplete work by

Kelsey, a hydro survey was done by Aaron Env. A UST Notification form received on 11/7/90 has 2-4k and 1-3k gasoline, and 1-550 WO USTs removed on 10/29/90. The tanks were last used in 5/80 and have remained in place since then.CT DEP LUST Questionnaire returned to sender (DEP) by post officeA piece of correspondence from the OCSRD files received on 12/8/91 mentions the removal of the tanks. Aaron suggests a Phase II Hydro Assessment. The highest TPH in the bottom

of the tank grave is 3821ppm.

TRI CHEM (Continued) 1011854961

Parcel size: 2.57

Property Description: The property most recently consisted of an office building and

parking lot at 114 Manhattan Street in Stamford. The site is contaminated by hazardous substance, most notably Volatile Organic Compounds (VOCs), polynuclear aromatic hydrocarbons (PAHs), arsenic, mercury and extractable total petroleum hydrocarbon (ETPH) in the soil. The Phase I assessment report notes that by 1901, Manhattan Street consisted of residential properties interspersed with commercial buildings. A database report generated by EcoSearch noted the site was the previous location of the Tri-Chem chemical plant. A review of historical maps noted the presence of a gasoline underground storage tank (UST) on the property between 1930 and 1964. A report of State and Federal databases indicated that the site, as Tri-Chem, was listed as a Connecticut Hazardous Waste site. Historic information obtained during a Phase I site assessment indicated that approximately 800 drums of hazardous waste were removed from this area in the early 1980s. Additional historic documents revealed the presence of a gasoline tank on the property in the 1930s. Phase I and II site assessments were undertaken on the property using funds from a Brownfields Assessment Pilot Grant. The Phase II report described the nature and extent of the contamination as follows: Soil samples

vielded evidence of multiple contaminants. The majority of VOCs detected are chlorinated solvents and the breakdown substances associated with them. Several concentrations of VOCs were found to exceed the applicable criteria. The concentrations of several PAHs, arsenic, mercury also exceeded applicable standards. Groundwater samples also contained a variety of hazardous substances. These are believed to be impacted by the soil contamination and will therefore be resolved once the soil is remediated.

Property Description: The property most recently consisted of an office building and

parking lot at 114 Manhattan Street in Stamford. The site is

contaminated by hazardous substance, most notably Volatile Organic Compounds (VOCs), polynuclear aromatic hydrocarbons (PAHs), arsenic, mercury and extractable total petroleum hydrocarbon (ETPH) in the soil. The Phase I assessment report notes that by 1901, Manhattan

Street consisted of residential properties interspersed with

commercial buildings. A database report generated by EcoSearch noted the site was the previous location of the Tri-Chem chemical plant. A

review of historical maps noted the presence of a gasoline underground storage tank (UST) on the property between 1930 and 1964. A report of State and Federal databases indicated that the site, as Tri-Chem, was listed as a Connecticut Hazardous Waste site. Historic information obtained during a Phase I site assessment indicated that approximately 800 drums of hazardous waste were removed from this area in the early 1980s. Additional historic documents revealed the presence of a gasoline tank on the property in the 1930s. Phase I and Il site assessments were undertaken on the property using funds from a Brownfields Assessment Pilot Grant. The Phase II report described the nature and extent of the contamination as follows: Soil samples yielded evidence of multiple contaminants. The majority of VOCs detected are chlorinated solvents and the breakdown substances associated with them. Several concentrations of VOCs were found to exceed the applicable criteria. The concentrations of several PAHs, arsenic, mercury also exceeded applicable standards. Groundwater samples also contained a variety of hazardous substances. These are believed to be impacted by the soil contamination and will therefore be resolved once the soil is remediated.

SEH:

Date Notified: 05/26/2000

Type Of Hazard: Pollution in the top two feet of soil may pose a risk to human health

as a result of direct contact.

Response: DEP reviewed information provided and determined that the polluted

soil is under pavement, limiting the potential for contact.

Actions: Access to polluted soil is restricted; no specific hazard abatement

action necessary. Remediation subsequently completed under EPA PCB and

Brownfields programs in 2000.

GW Comments: All business and residences in the area are serviced by public

utility water supply. No designated wetlands exist on site or adjacent properties. The nearest water body, the West Branch of the Stamford Harbor, is ~2,000 ft southwest of site. There are no public supply withdrawl points within 1 mile of site. No catch basins or

swales were observed on site.

Location Desc: Surifical Geology: soils consisting of very fine grained gray brown

sands with trace amounts of silts, generall consistent with

near-shore glacio-depositional environments.Bedrock Geology: Golden

Hill Schist, a gray to silver, medium to coarse grained schist and

granofels.

US BROWNFIELDS: Relative:

Stamford, City of Recipient name: Lower

Grant type: Cleanup Actual: Property name: **SEABOARD EQUITIES**

12 ft. Property #: Not reported

Parcel size: .63

Property Description: The property is contaminated by hazardous substances, most notably Volatile Organic Compounds (VOCs), polynuclear aromatic hydrocarbons

(PAHs), arsenic and extractable total petroleum hyrdocarbon (ETPH) in the soil. The property has a history of industrial and commercial use. Most significantly, between 1888 and 1930 it was the site of the Stamford Gas Light Company, a coal gasification plant. An office building managed by Antares Real Estate is currently located on the site. Please note that only a portion of this parcel was purchased

for cleanup as part of the Stamford Urban Transitway project.

Property Transfer Forms: Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled

loss, seepage or filtration of hazardous waste has occurred at the parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III certification agrees to investigate and remediate the site in accordance with the remediation standards. The statute does not

accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a

completed Environmental Condition Assessment Form

(ECAF)(DEP-PERD-PTP-200).

Property Transfer Forms: Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled

loss, seepage or filtration of hazardous waste has occurred at the parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III

certification agrees to investigate and remediate the site in accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a

completed Environmental Condition Assessment Form

(ECAF)(DEP-PERD-PTP-200).

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting

Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Property Transfer Forms: Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled loss, seepage or filtration of hazardous waste has occurred at the

parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III certification agrees to investigate and remediate the site in

accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a completed Environmental Condition Assessment Form

(ECAF)(DEP-PERD-PTP-200).

. Waste name: CARBAMIC ACID, ETHYL ESTER (OR) ETHYL CARBAMATE (URETHANE)

Date form received by agency: 12/15/1980
Site name: GAISSER E J INC
Classification: Small Quantity Generator

Waste code: D001

. Waste name: IGNITABLE WASTE

Waste code: D035

. Waste name: METHYL ETHYL KETONE

Waste code: F003

Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

MIXTURES.

Waste code: F005

. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001. F002. OR F004: AND STILL BOTTOMS FROM THE RECOVERY OF

THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Corrective Action Summary:

Event date: 08/17/1992

Event: RFA Completed, Assessment was a PA-Plus.

Event date: 09/02/1992

Event: CA Prioritization, Facility or area was assigned a medium corrective

action priority.

Event date: 09/21/2011

Event: Date For Remedy Selection (CM Imposed)

Event date: 09/21/2011 Event: CA550RC

Event date: 02/23/2012

Event: Current Human Exposures under Control, Yes, Current Human Exposures

Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant

changes at the facility.

Igration of Contaminated Groundwater under Control, Yes, Migration of Event:

Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of

significant changes at the facility.

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

Direction Distance

EDR ID Number Elevation **EPA ID Number** Site Database(s)

CYTEC INDUSTRIES INC (Continued)

1000358550

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 23610

Waste code: D002

A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS Waste name:

> CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Event date: 09/15/1993

Event: CA Prioritization, Facility or area was assigned a medium corrective

action priority.

Event date: 04/14/1995

Event: Stabilization Measures Evaluation, This facility is not amenable to

stabilization activity because of a lack of technical data. An evaluation has been completed, but further data is necessary to determine stabilization measures, feasibility or appropriateness. This

status should be changed when data becomes available.

Event date: 06/27/1996

Event: Stabilization Measures Implemented, Primary measure is source removal

and/or treatment (e.g., soil or waste excavation, in-situ soil

treatment, off-site treatment).

Event date: 06/27/1996

Event: Stabilization Construction Completed

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Inventory

CBRA has identified over 200 brownfield sites eligible for redevelopment. In most cases these are prime properties for commercial or industrial use. CBRA's grants, assistance and financing lower the financial risks and eliminate the legal, regulatory and environmental risks of redevelopment.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

SEH: List of Significant Environmental Hazards Report to DEEP

The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

USGS TOPOGRAPHIC MAP

Target Property Map: 5641973 STAMFORD, CT

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

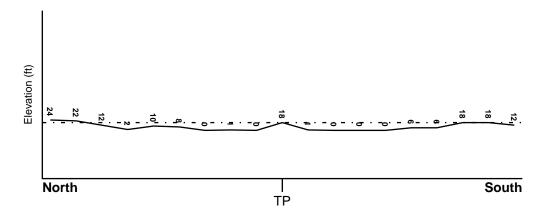

TOPOGRAPHIC INFORMATION

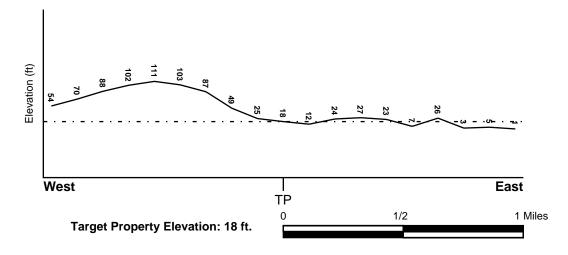

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

STAMFORD YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: material

Hydrologic Group: Not reported

Soil Drainage Class: Hydric Status: Unknown

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Connecticut Leachate and Wastewater Discharge Sites

Source: Department of Environmental Protection

The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP. These maps locate surface and groundwater discharges that (1) have received a waste water discharge permit from the state or (2) are historic and now defunct waste sites or (3) are locations of accidental spills, leaks, or discharges of a variety of liquid or solid wastes.

EPA-Approved Sole Source Aquifers in Connecticut

Source: EPA

Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

Community and Non-Community Water System Wells

Source: Department of Public Health, Water Supplies Section

Telephone: 860-509-7333

Active, emergency and inactive wells used for potable purposes that are owned and operated by active community and non-community water systems in Connecticut.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by TRC Environmental Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

APPENDIX E: TRC STAFF AND ENVIRONMENTAL PROFESSIONAL QUALIFICATIONS/RESUMES

KATHLEEN M. SHEFFIELD

EDUCATION

B.S., Environmental Earth Science, Eastern Connecticut State University, 2004

AREAS OF EXPERTISE

Ms. Kathleen M. Sheffield has over four years of experience encompassing:

- Phase I, II & III Site Investigations and Support
- Field/Remedial Investigations
- Data Research and Review
- Technical Reporting

REPRESENTATIVE EXPERIENCE

Ms. Sheffield is an Associate Project Manager in TRC's Remediation Practice. She participates in field investigations and remediation activities, assesses environmental data, completes site inspections and reports on site investigations, performs background investigations such as municipal, state and federal research, and completes environmental sampling.

FAA William J. Hughes Technical Center, Field Investigations and Environmental Sampling – Atlantic City, NJ (Technical Support and/or Field Staff: 2006 – Present)

Ms. Sheffield assists in a variety of remedial investigation and periodic monitoring events. Ms. Sheffield participates in quarterly ground water sampling as field staff. She also assists in the preparation of quarterly ground water reports. Ms. Sheffield has also performed as the team leader for Phase I environmental investigations on portions of the FAA property as well as assisted in writing the Phase I investigation report. She has recently been involved in a 72-hour aquifer pump test.

Shieldalloy Metallurgical Corporation, Environmental Sampling – Newfield, NJ (Technical Support and/or Field Staff: 2006 – Present)

Ms. Sheffield regularly participates in quarterly ground water sampling, including low flow sampling, at the New Jersey facility. She also assists with the preparation of data evaluation and technical report preparation. In addition, she has been involved with drilling and vertical ground water profiling as well as permitting for the site.

Connecticut Department of Transportation (ConnDOT), Environmental Investigation – Connecticut (Field Staff: 2007 - Present)

Ms. Sheffield has served as field staff for a wide variety of projects for the ConnDOT. She has been the field lead for several Phase II investigations as well as completed the data evaluation and reporting for the different sites as well as being lead oversight of sub-contractors for several Conn DOT projects. She has also been involved with the Q-Bridge project in New Haven, CT where she served as field staff collecting soil samples and keeping track of soil transportation on and off site. Ms.

Sheffield was also involved in a Phase II investigation in Hamden, CT in which her responsibilities included concrete sampling, soil sampling and data analysis.

City of Stamford, Environmental Support Services – Stamford, CT (Field Staff: 2007 - Present)

Ms. Sheffield has served as field staff for the Stamford Urban Transitway project with responsibilities that include Geoprobing, temporary monitoring well installations and ground water sampling as well as underground storage tank removals and confirmation soil sampling. Ms. Sheffiled has recently assisted in well installation and development for the Closed Municipal Landfill.

Fox Run Mall, Environmental Investigation/Remedial Activities – Glastonbury, CT (Technical Support and/or Field Leader: 2007 - Present)

Ms. Sheffield has served as lead field scientist for Phase II and Phase III environmental investigations. Her responsibilities have included Geoprobing and collection of soil samples, installation of ground water monitoring wells and monitoring well development and sampling. She is currently the lead field scientist for the bi-annual groundwater sampling.

New York City Department of Environmental Protection, Environmental Investigation – New York (Technical Support and/or Field Leader: 2007 - Present)

Ms. Sheffield has served on many projects for the NYCDEP. She has conducted background research for numerous Phase I environmental investigations for various properties throughout New York State as well as interpreted data and written reports. Ms. Sheffield has also been the field leader for several Phase II environmental investigations. Her responsibilities included Geoprobing, test pitting, collection of soil samples, installation of temporary wells and the collection of ground water samples.

SPX Corporation, O-Z Gedney Facility, Environmental Sampling – Terryville, CT (Field Leader: 2008 - Present)

Ms Sheffield is currently the field lead for the quarterly post-remediation groundwater sampling that occurs at the site. This involves low flow sampling, data evaluation and preparation of reports.

SPX Corporation, Fenn Manufacturing Facility, Environmental Sampling – Newington, CT (Field Leader: 2008 - Present)

Ms Sheffield is currently the field lead for the quarterly post-remediation groundwater sampling that occurs at the site. This involves low flow sampling, data evaluation and preparation of reports. She has also been head oversight for the lead injection program which involved the installation of 15 bedrock wells as well as the oversight of sub-contractors during lead injection activities. Responsibilities also included on-site soil characterization, field screening of soil samples, and ground water sampling and monitoring prior to, during and after the injection program.

Connecticut Resources Recovery Authority, Environmental Sampling/ Environmental Investigation Oversight, Hartford/Franklin, CT (Project Scientist/Field Leader 2008 – Present)

Ms Sheffield is currently the field lead for the quarterly groundwater sampling that occurs at the CRRA South Meadows site located in Hartford, CT. This involves low flow sampling, data evaluation and preparation of reports. She was also involved in the environmental investigation and subsequent hydrogeologic study for ash landfill siting in Connecticut. This involved the oversight of overburden monitoring well installation as well as overseeing two pump tests.

Wall of America, Environmental Remediation/Environmental Sampling/Post Remediation Sampling, Winsted, CT (Project Scientist/Field Leader: 2008 – Present)

Ms. Sheffield was the lead field scientist for the soil excavation activities that took place at the Wall of America property. Her responsibilities included oversight of excavation activities, oversight of sub-contractors, soil collection and data evaluation. Ms. Sheffield was also involved in the installation several overburden monitoring wells on-site. These wells were installed in order to conduct post-remediation ground water sampling in which she is also field lead.

Remedial Investigation/Feasibility Study/Interim Remedial Measure – Former Crown Vantage Landfill, Milford, New Jersey (Project Environmental Scientist: 2008-2009)

Ms. Sheffield helped to oversee sub-contractors perform test pitting and drum removal activities during the RI/FS. The RI/FS involved the excavation of test pits to evaluate the presence of buried drums, and the collection of surface soil, sediment, surface water and pore water samples to evaluate impacts to human health and the environment related to the presence of buried hazardous wastes.

Griffin Hospital, Site Investigation/Remediation Activities – Derby, CT (Environmental Scientist/Field Leader: 2006 - 2007)

Ms. Sheffield served as lead field environmental scientist at Griffin Hospital for several different environmental investigations and remedial activities including Geoprobe investigations, excavation activities and underground storage tank removals. Ms. Sheffield has also been involved in data evaluation and reporting for the site.

AES Thames, SPEDES Permit Renewal – Uncasville, CT (Technical Support: 2007)

Ms. Sheffield has served as support for the renewal of the SPEDES permit for AES Corporation. Her responsibilities included background research at the site to determine all the chemical constituents that were present at the site and incorporating them into the discharge permit.

City of Stamford, Phase I and II Investigations – Stamford, CT (Field Staff: 2007)

Ms. Sheffield performed background research and reporting for a Phase I environmental investigation at the West Beach fields. Ms. Sheffield also assisted with the Phase II field investigation at this site prior to the design and installation of artificial turf.

SPX Corporation, O-Z Gedney Facility, Environmental Sampling – Terryville, CT (Technical Support: 2007)

Ms. Sheffield assisted in municipal and state background research for the O-Z Gedney facility.

Town of Winchester Brownfields Program, Lippincott Moving & Storage, Environmental Sampling – Winsted, CT (Technical Support: 2007)

Ms. Sheffield has been involved in quarterly low-flow ground water sampling at the Lippincott site.

Former Bridgeport Brass Company, Environmental Investigation – Bridgeport, CT (Technical Support and/or Field Leader: 2007)

Ms. Sheffield has served as lead field scientist for Phase I and Phase II environmental investigations. Her responsibilities have included background research and report writing, Geoprobing and and drilling, collection of soil samples, installation of ground water monitoring wells and monitoring well development and sampling.

Ulbrich Steel, Environmental Investigation – Wallingford, CT (Technical Support and/or Field Leader: 2007)

Ms. Sheffield has been involved in quarterly low-flow ground water sampling at the Ulbrich Steel site.

City of Danbury, Remedial Activities – Danbury, CT (Field Leader: 2007)

Ms. Sheffield has been involved in several underground storage tank removals for the City of Danbury. Her responsibilities included directing subcontractors and the collection of confirmation soil samples.

SPECIALIZED TRAINING

- OSHA 40-Hour HAZWOPER Training (29 CFR 1910.120(e)), July 2002
- OSHA 8-Hour HAZWOPER Annual Refresher Training
- Amtrak Contractor Safety & Security Training, September 2010
- Metro North Training, 2010

SARAH J. TROMBETTA, CPG, LEP

EDUCATION

M.S., Geology, University of Massachusetts, 1990 B.S., Geology, with Honors, Lafayette College, 1984

PROFESSIONAL REGISTRATIONS

Certified Professional Geologist, American Institute of Professional Geologists, (#8899), 1993

Licensed Environmental Professional, State of Connecticut, (#294), 1998 Certified Hazardous Materials Manager (#15404), 2010

AREAS OF EXPERTISE

Ms. Sarah J. Trombetta, CPG, LEP has program management and technical experience in the following general areas:

- Project Management, On-Call Contracts
- Brownfields and Property Redevelopment
- Permitting and Environmental Impact Evaluations
- Phase I, II, and III Environmental Site Assessments
- Compliance Audits
- Hazardous Waste Site Investigations
- Remedial Program Implementation Oversight
- Pollution Prevention
- Water Supply and Aquifer Protection Investigations
- Environmental Training

REPRESENTATIVE EXPERIENCE

Ms. Trombetta has 30 years of experience and is Manager of TRC's Engineering, Construction and Remediation Practice in the Windsor, Connecticut office. She also serves as a project manager for remedial program implementation for commercial, industrial and government clients. Her experience ranges from Project Manager/Field Operations Manager at Superfund or listed hazardous waste sites to the management of field investigations at petroleum, chlorinated solvent, and polychlorinated biphenyl (PCB) impacted sites. Several of these sites have progressed into remediation design and implementation. Ms. Trombetta has managed or provided technical review for over 800 Phase I, II and III environmental site assessments. She has also managed aquifer investigations. Ms. Trombetta is presently managing two Brownfields Programs in Connecticut where her responsibilities include management of Phase I, II, and III site assessments, remediation services, coordination with federal and state agencies, and community outreach efforts.

Project Management, On-Call Contracts

United States Postal Service, On-Call Contract – Northeast District (Project Manager: 1995 – 2003)

Ms. Trombetta served as Project Manager for an indefinite quantity, three year contract with the Northeast Area of the USPS. The work for the USPS includes Phase I and Phase II site assessments, underground storage tank management, historical/ archaeological studies, traffic analysis, wetlands delineation and evaluations of environmental regulations.

New York City Department of Environmental Protection, On-Call Contract – NY (Project Manager: 1998 – Present)

Ms. Trombetta served as Project Manager for three year contract for NYCDEP to complete Phase I site assessments on properties to be purchased as part of a Land Acquisition and Stewardship Program. The Phase I assessments include evaluation of land use surrounding these properties located with watershed boundaries. Ms. Trombetta has managed and coordinated Phase I ESAs in rural and suburban areas and has identified, through the Phase I and potential Phase II process, hazards to the surface and ground water quality of the watersheds at sites where the potential exists for contaminants to have been released to the ground. Phase II scopes of work are prepared to investigate the soil and ground water quality at the site. Site assessment services are conducted in accordance with American Standard Testing and Materials (ASTM), municipal, New York State and federal regulations and guidelines.

Brownfields and Property Redevelopment

Waterbury Development Corporation (WDC), Brownfields Assessment Services – Waterbury, CT (Project Manager: 2007 - Present)

Ms. Trombetta is serving as Project Manager for the provision of Brownfields assessment services to the WDC. She managed the completion of a Phase II investigation of a property located at 1144–1200 South Main Street (the former Everybody's Market) in 2007. The site had been subjected to significant filling over many years and TRC determined the extent and general nature of the fill as well as its impact to soil and ground water quality. TRC has also performed a hazardous materials survey and supplied plans and specifications at a property known as the Harper Leader site. This property was formerly occupied by a printing operation and the building had deteriorated and required demolition. She has also managed the completion of Phase I, II and III site assessments, as well as a Remedial Action Plan for properties located on Division Street in Waterbury. These sites will become athletic fields and a playground.

City of Stamford, Brownfields Program Support and CEPA/NEPA Environmental Assessment – Stamford, CT (Project Manager: 1999 – 2006) Ms. Trombetta served as Project Manager for a program to provide environmental support services as part of Stamford's Urban Transitway (SUT) and Brownfields Showcase projects. To accommodate the new connector, streets will be widened,

and areas for new business development will be created along the route. Ms. Trombetta managed the completion of Phase I site assessments of 72 properties, the entire SUT area. She also managed 15 Phase II site assessments within the SUT and oversaw the completion of five Phase III site assessments with remedial action plans. In conjunction with the Brownfields investigation work, Ms. Trombetta assisted in preparing two Environmental Assessments (EA) in accordance with the Connecticut Department of Transportation's UMTA criteria. Each EA includes an environmental impacts evaluation of air quality, noise, water quality, wetlands, ecologically sensitive areas/endangered species, traffic/parking, energy, and historic properties. She also managed the completion of Phase II investigations on six other sites for the Engineering Department as well as Phase I assessments for the Urban Redevelopment Commission. In the second construction phase of the SUT project, Ms. Trombetta is overseeing more Phase I and II assessments of other properties using additional EPA brownfields funding.

City of Stamford, Closed Municipal Landfill - CT (Project Manager: 2009 – present)

Ms. Trombetta is the project manager for a ground water investigation of a domestic landfill currently in use as a recycling center and composting area. The project included installation of monitoring wells inside and outside the footprint of the landfill which had been closed since the 1970's. Ground water quality analysis and hydraulic analysis was performed to determine if landfill leachate was impacting nearby residential neighborhoods. Subsequent to this investigation TRC prepared a Landfill Closure Plan that proposed a significant investigation of the landfill and surrounding area and a preliminary design to cap the landfill.

City of Stamford, Phase II Investigations, Athletic Fields – Stamford, CT (Project Manager: 2007)

Ms. Trombetta oversaw the completion of investigations of both subsurface and topsoil at three locations within the City. These investigations, undertaken at the request of the Engineering Bureau, were completed to provide information on these sites prior to the design and installation of artificial turf athletic fields.

City of Stamford, Remediation Services for the Stamford Urban Transitway (SUT) – Stamford, CT (Project Manager: 2007 – Present)

After the completion of the investigation work at the five Brownfields sites within the SUT corridor, TRC has begun the remediation phase of these projects. As Project Manager, Ms. Trombetta is responsible for Remedial Action Plan implementation, interaction with the USEPA and CTDEP, and final documentation of the remedial actions. Two of the five sites have been remediated with the remaining three to be completed during the ongoing roadway construction.

City of Stamford, Environmental Support Services for the Stamford Urban Transitway (SUT) – Stamford, CT (Project Manager: 2007 – Present)

Ms. Trombetta is the Project Manager for environmental support services needed during the construction of the SUT Phase I. These services include assistance with

environmental issues that arise during the roadway construction that are not related to the Brownfields sites including abandoned underground storage tanks and other soil/ground water issues.

Bridgeport Economic Development Corporation, Seaview Avenue Redevelopment – Bridgeport, CT (Project Manager: 2002 – 2006)

Ms. Trombetta assisted the Bridgeport Economic Development Corporation (BEDCO) with a project geared toward the redevelopment of the Seaview Avenue area. She provided BEDCO with environmental investigations performed under Transfer Act Site Assessment (TASA) guidance. Work included supplemental Phase I site assessments, and designing and implementing Phase II investigation programs investigating petroleum and metals contamination at several current and historic industrial sites. Also Ms. Trombetta conducted Phase III investigations and prepared two Remedial Action Plans (RAPs) for remediation work at two of the BEDCO sites. In addition, she prepared a bid document for the implementation of the RAPs. Other activities included soil sampling, well installation, ground water sampling and remedial evaluations. This work was overseen by the Connecticut Department Environmental Protection (CTDEP) and the Connecticut Department of Economic and Community Development (DECD).

City of Winsted/Town of Winchester, Brownfields Program – Winchester, CT (Project Manager: 2000-2011)

Ms. Trombetta served as Project Manager for a program performed as part of the Winsted/Winchester Brownfields Program to conduct Phase I, II and III site assessments and to conduct an extensive community education program. She developed a cost-efficient, focused approach designed to result in rapid EPA approval and timely collection of data needed to make site decisions. Under this program, Ms. Trombetta managed the completion of Task 120 and Task 210 investigations at three properties in Winsted as part of a ConnDOT road widening project. The Task 210 investigation included soil sampling using a Geoprobe and analysis of collected soil samples for suspected contaminants. Other projects included investigation and remediation at former mill sites as well as other types of sites. Three of these sites, Lippincott Moving and Storage, the Nader Building and a portion of Whiting Mills continued into site cleanup.

Town of Vernon, EPA Cleanup Program – Vernon, CT (Project Manager: 2005 – 2006)

Ms. Trombetta served as Project Manager for a remediation project at the Hockanum Mill, a Brownfields site in the Town of Vernon undergoing redevelopment using an EPA Brownfields Cleanup Grant. The program included the preparation of an Environmental Condition Assessment Form (ECAF) and Remedial Action Plan. The QAPP was reviewed and approved by the EPA. Ms. Trombetta assisted the Town with their Community Relations Plan prior to implementing the proposed remediation in the area of an underground storage tank.

City of New Britain, EPA Brownfields Program – New Britain, CT (Project Manager: 1999 – 2010)

Ms. Trombetta served as Project Manager for the City of New Britain's Brownfields Pilot Program. She managed the completion of ten Phase I and four Phase II site assessments. She also coordinated public meetings for a neighborhood revitalization zone in the City. Ms. Trombetta also assisted the City during the emergency cleanup of a Brownfields site after a fire. With a Cleanup Grant provided by the EPA, Ms. Trombetta managed the cleanup of a former service station site that has since become the retail outlet for a certified organic farm.

City of Middletown, EPA Brownfields Program – Middletown, CT (Project Manager: 1999 – 2004)

For the City of Middletown, Ms. Trombetta managed Phase I, II and III site assessments within the area designated by the City as Brownfields sites. She managed an ecological study of a brook within the targeted area.

City of Danbury, Brownfields Program Support – Danbury, CT (Project Manager: 1998 – 2000)

Ms. Trombetta managed a Phase III environmental site assessment and feasibility study of former hat factory site, a city-owned Brownfields property with known mercury, solvent and oil contamination in soil and ground water, as funded through the EPA Brownfields Program. Project included testing of site media, risk characterization of surface soils and the hazards presented by the mercury contamination on trespassers, preparation of Fact Sheets, organization of community meetings, coordination and completion of a phytoremediation treatability study, a full evaluation of soil and ground water remedial alternatives, and strategic support to evaluate possible funding sources for cleanup.

City of Danbury, Environmental Engineering Services – Danbury, CT (Task Manager: 2006)

For the City of Danbury, Ms. Trombetta oversaw soil sample collection and ground water monitoring tasks related to the construction of a new parking garage. The sampling was conducted in response to the discovery of an underground fuel oil storage tank during construction.

Connecticut Department of Economic and Community Development (DECD), Bridgeport Intermodal Transportation Center (ITC), CEPA Project Oversight – Bridgeport, CT (Project Manager: 2002 – 2003)

Ms. Trombetta served as Project Manager for the oversight of the CEPA process for the ITC, during which TRC oversaw, managed and directed the City of Bridgeport's CEPA/NEPA consultants in meeting the CEPA obligations for the project. The project included review of public scoping and public outreach, data collection and definition of existing conditions, identification of alternatives, assessment of impacts, and identification of mitigation measures. The CEPA study areas for the project included land use, traffic, community resources, cultural resources, air quality, noise,

water quality, solid and hazardous waste, floodplains, wetlands, utilities and construction.

Permitting and Environmental Impact Evaluations

Connecticut Resources Recovery Authority (CRRA), New Ash Landfill Permitting – Franklin, CT (Task Manager: 2009)

Assisted in the initial environmental investigation and subsequent hydrogeologic study for ash landfill siting in Connecticut. Met with the regulatory agencies to discuss the scope of the investigation and the aquifer analysis necessary to determine water supply capabilities for the area. Designed drilling and monitoring well installation program, managed sediment and surface water sampling program, oversaw geophysical study of site location, and participated in public informational events. Designed and implemented full-scale aquifer analysis study including 72-hour pumping test for two wells and assisted with the data evaluation. Prepared Aquifer Analysis Report and presented the results of the analysis to the regulatory agency.

Pennsylvania Power & Light Global, Inc., Alfred L. Pierce Generating Station, Electrical Power Plant Siting and Permitting – Wallingford, CT (Task Manager: 1998 – 1999)

Ms. Trombetta prepared the Environmental Effects documents for submittal to the Town of Wallingford and to the Connecticut Siting Council to evaluate and present the potential effect of the placement of the power plant. Factors evaluated include site and surrounding land use, zoning, socioeconomics, visual resources, noise, traffic, historical/archaeological resources, geology, ecology, wetlands, air quality and surface/ground water resources. Ms. Trombetta also coordinated and provided oversight for environmental permit applications. Major permit applications were developed for air emissions and wastewater discharge.

U.S. Generating, Lake Road Generating Station, Electrical Power Plant Siting and Permitting – Killingly, CT (Task Manager: 1997 – 2000)

Ms. Trombetta prepared the Environmental Effects documents for submittal to the Town of Killingly and to the Connecticut Siting Council to evaluate and present the potential effect of the placement of the power plant. Factors evaluated include site and surrounding land use, zoning, socioeconomics, visual resources, noise, traffic, historical/archaeological resources, geology, ecology, wetlands, air quality and surface/ground water resources. Ms. Trombetta also coordinated and provided oversight for environmental permit applications.

Environmental Site Assessments/Compliance Audits

Connecticut Department of Transportation (ConnDOT), Various Sites/Projects – CT (Task Manager: 2007 - Present)

As a Task Manager for the current on-call Soil and Ground Water Contract with ConnDOT, Ms. Trombetta oversees the performance of environmental investigation

and remediation projects associated with ConnDOT construction and improvement projects. These services include performance of due diligence investigations for corridor projects, site acquisitions and facilities undergoing planned improvements; characterization of soil, ground water, sediment and surface water impacts; and provision of regulatory compliance support for a wide variety of related projects. Since the inception of the contract in 2007, TRC has been involved in over 20 projects, involving all of the above activities. Projects have included construction inspection on six ongoing construction programs, ranging from the construction of a new salt shed facility to the environmental oversight for the Q Bridge/Route 95 Corridor Improvements project. Other project work has involved several roadway corridor improvements, bridge construction projects, bus and rail facilities, and soil remediation associated with several contaminated historical sites. Existing regulatory program support projects include auditing of ConnDOT-approved disposal vendors, and development and implementation of a monitoring/documentation program for all ConnDOT maintenance facility oil/water separator systems.

Phase I ESA Services, Housing Authority of the City of Stamford, Connecticut (Project Manager: 2006)

Ms. Trombetta managed the completion of a Phase I Environmental Site Assessment of the property located at 0 Clinton Avenue in Stamford, Connecticut. The Phase I ESA was completed to current ASTM standards as well as in accordance with State of Connecticut Transfer Act guidance. This assessment was an update of a Phase I completed in 2005 for the Authority and Urban Redevelopment Commission. The updated assessment was completed prior to beginning redevelopment of the site.

BCS Acquisitions, Multi-Site Phase I and II Investigations – CT (Project Manager: 1994)

Ms. Trombetta served as Project Manager for seventeen Phase II investigations for multiple sites that were completed in a three week time-frame. Several of the projects also included Phase I assessments. Most of the sites consisted of commercial or industrial facilities involved in a transfer of mortgages.

Commercial Lending Company, Multi-Site Phase I Assessments – Northeast US (Project Manager: 1993)

For a major commercial real estate lending company, Ms. Trombetta managed eleven Phase I site assessments for a series of self-storage facilities. The site assessments included detailed background research and asbestos, radon, and urea formaldehyde foam insulation inspections.

Fletcher Asset Management, Inc., Environmental Site Assessments – Cornwall, CT (Project Manager: 2000 – 2001)

Ms. Trombetta served as Project Manager for Phase I environmental site assessments at ten properties, totaling approximately 500 acres, in Cornwall, Connecticut. These properties consisted of rural vacant land situated in the rugged northwest hills of the state. Work was completed within two to three weeks for each

site. Due to the rural location of the sites, special attention was made to identifying potential historic agricultural disposal areas (i.e., farm dumps) as well as sensitive areas, including wetlands and neighboring state-owned lands.

Major Lending Company, Environmental Assessments/Audits – Various States (Project Manager: 1993 – 1998)

Ms. Trombetta served as Project Manager for various projects with major lending company. She provided technical oversight and senior review of environmental assessments, audits, and subsurface investigations completed prior to property financing. Projects included multi-site commercial facilities, industrial complexes and other commercial/retail properties.

Ulbrich Stainless Steel and Special Metals, Inc., Environmental Site Assessments/Compliance Audits – Various States (Project Manager: 1997 – 1998) Ms. Trombetta provided senior technical review and oversight for environmental assessments and compliance audits which included asbestos and lead paint surveys, underground storage tank testing and management, subsequent subsurface investigations, industrial hygiene inspections, and stormwater/National Pollutant Discharge Elimination System (NPDES) permitting.

Remedial Program Implementation Oversight

SPX Corporation, Fenn Manufacturing, Environmental Investigation/Remediation – Newington, CT (Project Manager: 2001 – Present) Currently Ms. Trombetta is managing the site investigation and remediation for a manufacturer of helicopter motor parts. She is providing LEP oversight through the Transfer Act program.

SPX Corporation, O-Z Gedney, Environmental Investigation –Terryville, CT (Project Manager: 2000 – Present)

Ms. Trombetta is managing the Phase III investigation under the Transfer Act guidance at a former manufacturing facility. She has managed the Transfer Act Site Assessment (TASA) Phase I, II and III work as well as the Remedial Action Plan conducted under CTDEP oversight. Scope of work included test pit sampling, soil boring and monitoring well installation, sediment and surface water sampling and ground water sampling. The Remedial Action Plan was approved by CTDEP and both wetlands and zoning permits were obtained. A majority of the remedial action has been completed including soil excavation for petroleum and metals contamination.

One Research Drive Limited Partnership, Environmental Site Assessments – Stamford, CT (Project Manager: 2002 – Present)

Ms. Trombetta is managing the Phase I-III environmental site assessments and the Remedial Action Plan at a Transfer Act parcel in an industrial/commercial area in Stamford. A portion of the site was underlain by historical fill materials which did not meet the soil standards in the Connecticut Remediation Standard Regulations

(RSRs). Ms. Trombetta used a combination of removals (for materials which exceeded the Pollutant Mobility Criteria) and moving and covering soils which exceeded the Direct Exposure Criteria (with excavation restrictions) below a parking area to render soils inaccessible. This approach reduced the volume of soil removed for off-site disposal by 35% and did not adversely impact the use of the site.

Rohm and Haas, Former Adhesives Manufacturing Site, Remedial Investigation – Stamford, CT (Project Manager: 2004 – Present)

Ms. Trombetta managed the completion of an investigation and remediation of soil and ground water at a former adhesives manufacturing plant to address the requirements of the Connecticut Transfer Act and the Remediation Standard Regulations (RSRs). The investigation was directed at known Areas of Concern (AOC) including chemical storage, surface spills and production areas, but also identified several other area required remedial actions to comply with the RSRs. Those areas included total petroleum hydrocarbons (TPH), polychlorinated biphenyl (PCB) and solvent contaminants. Remediation has been completed and site closure was approved by the CTDEP.

Nielsen Hardware Corporation, Site Investigation and Remediation – Hartford, CT (Project Manager: 1991 – Present)

Ms. Trombetta is responsible for site investigation and subsequent oversight and construction management of four soil vapor extraction systems to remediate chlorinated solvents. The project included removal of more than 2,000 yards of cadmium and cyanide contaminated soil. The soil excavation site was returned to its original wetland state.

Hazardous Waste Site Investigations

Ms. Trombetta has been involved in a variety of hazardous waste site evaluations in a variety of roles including Project Manager and Field Operations Manager. These sites are generally Superfund or listed hazardous waste sites and she has worked on field sampling plans, monitoring programs, remedial investigation programs and report preparation.

Dominion Nuclear Connecticut, Inc., LEP Review – Waterford, CT (Project Manager: 2006)

TRC was retained by Dominion Nuclear Connecticut, Inc. to provide LEP review of an AOC at the facility. Project Manager for the evaluation of the data available for AOC M5 including the concentrations and distribution of constituents of concern (COCs) in the soil. Also completed a review of the applicability of statistical evaluations for compliance with the Connecticut RSRs.

City of Nashua, Closed EPA Landfill – Nashua, NH (Task Manager: 1993)

Ms. Trombetta conducted an investigation of a domestic/asbestos landfill underlying an elementary school. The project included obtaining a ground water discharge permit from the New Hampshire Department of Environmental Services.

Raytheon, Former Raytheon Optical Facility – Danbury, CT (Project Manager: 1991 – Present)

Ms. Trombetta serves as Project Manager for this ongoing project that includes investigation and remediation of two areas impacted by leaking underground gasoline storage tanks and an area impacted by PCBs leaked from three transformers. PCBs also impacted concrete and floor indoor surfaces in a portion of the facility which has been remediated. Management support is also being provided for negotiations with the Connecticut Department of Environmental Protection (CTDEP) to set cleanup levels and receive reimbursement from the CTDEP Underground Storage Tank Cleanup Fund.

Plainville Electroplating, Plating Facility – Plainville, CT (Task Manager: 1997) Ms. Trombetta coordinated field investigation for a RCRA assessment program and RCRA quarterly monitoring of ground water. She reviewed supplemental work plan based on regulatory review and commentary.

New York City Department of General Service, Former Landfill Investigation – New York, NY (Field Operations Manager: 1994 – 1996)

Ms. Trombetta served as Field Operations Manager for a methane/hazardous waste/indoor air quality project at the site of a former NYC landfill currently occupied by a correctional facility. The project included installing over 120 soil borings, conducting a facility-wide geophysical investigation and evaluating the effects of landfill gases on indoor air quality.

New York City Housing Authority, Underground Storage Tank Investigations – New York, NY (Task Manager: 1991 – 1994)

Ms. Trombetta participated in the investigation of soil and ground water contamination due to underground storage tanks. Investigations included drilling, monitoring well installation and interpretation of soil and ground water contamination in a variety of geologic settings throughout the five boroughs including marine deposits, bedrock, glacial outwash and till. She prepared Investigation Summary Reports and Remedial Plans for various sites. The focus of the program was to characterize and delineate the extent of oil-contaminated soils and ground water contamination, prior to remediation.

New York City School Construction Authority, Site Assessments and Remediation Services – New York, NY (Task Manager: 1990 – 1992)

Ms. Trombetta managed the site assessment, remedial investigation, remedial design, and remediation oversight tasks at more than 10 sites. Detailed tasks included record searches at the Building Department and Fire Department, site walkover for site assessment, geophysical surveys, soil gas surveys, soil borings,

monitoring well installation, soil and ground water sampling, slug/pumping tests, remedial design (conceptual/numerical modeling), remediation oversight (UST removal, building demolition, contaminated soil excavation) and post-remediation confirmation sampling.

State of New Jersey, New Jersey Superfund Site – Newark, NJ (Task Manager: 1993)

Ms. Trombetta was responsible for evaluating Phase II remedial investigation field data and writing comprehensive report for a pesticide, petroleum and metals impacted Superfund site in New Jersey. Data included geophysical surveys, radiological surveys, air monitoring, surface, subsurface soil and sediment sampling, surface and ground water samples, and surface wipe sampling.

Solvents Recovery Systems, Superfund Site – Southington, CT (Task Manager: 1991 – 1993)

Ms. Trombetta was responsible for quarterly monitoring at site impacted by chlorinated solvents, both in the overburden and bedrock. Ground water from each monitoring event is evaluated to verify onsite remedial program effectiveness and offsite migration.

U.S. Naval Education and Training Center (NETC), Field Investigation – Newport, RI (Field Team: 1990 – 1991)

Ms. Trombetta participated in the field investigation of potential releases from underground storage tanks at Tank Farm 5. This work included drilling of soil borings and monitoring wells, soil and ground water sampling and preparation of the investigation report

Pollution Prevention

Federal Aviation Administration, Pollution Prevention Planning – Atlantic City, NJ (Task Manager: 1994)

Ms. Trombetta served as Task Manager for the preparation of the Pollution Prevention Plan for the FAA Technical Center. The plan encompasses all operations at the facility using or generating hazardous materials and evaluates options to minimize waste and reduce the need for hazardous materials facility-wide. The program included gathering baseline facility data, consolidating data and deriving a pollution prevention profile, ranking pollution prevention priorities and preparing a plan in accordance with state and federal regulations.

Water Supply and Aquifer Protection Investigations

Ms. Trombetta has conducted or managed several large and small scale aquifer investigations. These studies have included developing new supplies as well as investigating and recommending aquifer protection strategies for existing well fields. Her experience in these investigations ranged from field data collection to overall project management. She had designed well networks, collected stream flow data,

designed and completed aquifer pumping tests, performed ground water modeling and compiled reports.

City of Northampton, Aquifer Zone Mapping – Northampton, MA (Project Manager: 1987 – 1989)

Ms. Trombetta managed an aquifer delineation and protection study for the City of Northampton. Study included design of field investigation, completion of two aquifer pumping tests on each municipal well, ground water modeling, and presentation of results to city officials. Study resulted in approval by the Massachusetts Department of Environmental Protection of Zone 1, 2 and 3 delineation (equivalent to Level A mapping). Also resulted in draft land use and zoning policies for the city to protect the wellhead areas.

Town of Shelborn, New Water Supply Development – Shelborn, MA (Project Manager: 1989)

Ms. Trombetta managed full scale search for ground water supply for the Town of Shelborn. Tasks included geophysical methods, overseeing monitoring well drilling, and compiling maps with potential ground water producing zones.

Town of Paxton, New Water Supply Development – Paxton, MA (Project Manager: 1988)

Ms. Trombetta managed search of Paxton, Massachusetts for potential bedrock water supply. Field investigation included test well drilling and fracture trace analysis. Project also included potential for diverting a natural spring for use as a supply by the town.

Mt. Wachusett Recreational Area, New Water Supply Development – Sterling, MA (Project Manager: 1988)

Ms. Trombetta managed a project at a recreational resort where additional water was needed for drinking supplies and to augment snowmaking capabilities. Tasks included test well drilling, aquifer slug tests, aquifer pumping tests, and surface water monitoring. Project resulted in recommending a large diameter well and implementing a water supply program approved by the municipality.

Environmental Training

Naval Undersea Warfare Center, PCB Training – Newport, RI (Task Manager: 1993)

Ms. Trombetta designed and conducted a PCB training session for members of the environmental staff at the Naval Undersea Warfare Center in Newport, Rhode Island. The training included discussions of regulations, sampling and analysis techniques, reporting and compliance and spill cleanup.

SPECIALIZED TRAINING

• OSHA Hazardous Waste Site Training, 40 hours, 1989, Annual Refreshers

• OSHA Hazardous Waste Supervisors Training, 1992

PROFESSIONAL AFFILIATIONS

- American Institute of Professional Geologists
- Environmental Professionals of Connecticut

APPENDIX F: ENVIRONMENTAL PROFESSIONAL STATEMENT

DEFINITION OF ENVIRONMENTAL PROFESSIONAL AND RELEVANT EXPERIENCE THERETO PURSUANT TO 40 CFR 312

- (1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).
- (2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience.
- (3) An environmental professional should remain current in his or her field through participation in continuing education or other activities.
- (4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).
- (5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the Site. TRC personnel resume(s) are included in **Appendix E**.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.
