RE: Food Truck Parking

Dear Public Safety Committee,

Parking is a limited commodity in the South End since it houses many historical structures that didn't include driveways for parking. The growth of development in the South End is taking away many parking spaces which is causing residents to park in bike lanes, on sidewalks and block driveways, To allow Food Trucks to park in residential neighborhoods for an unlimited amount of time would cause more loitering, more littering and take away more of the limited parking from the residents who rely on off street parking. As a long-time resident in the South End and seeing the drastic reduction in parking it is imperative that parking is not taken away to comprise food trucks when we already have enough restaurants to accommodate the community.

Thank You,

Sheila Barney
