### Mayor DAVID R. MARTIN

DIRECTOR OF ADMINISTRATION MICHAEL E. HANDLER

Phone: (203) 977-4182 FAX: (203) 977-5657 Email: mhandler@stamfordct.gov

December 15, 2017

David R. Martin, Mayor Members of the Board of Finance

Mayor Martin and Members of the Board of Finance:

Section 8-20-3 of the Charter of the City of Stamford requires the Director of Administration to annually report upon the amount and nature of expenditures which, in his/her opinion, the City may incur safely for capital projects during each of the next six succeeding years, and the effect of such expenditures upon the current budgets for each of those years. In analyzing the amount of debt that the City may safely incur, a number of factors must be considered. Some of those factors are:

- Capital needs of the community
- Legal debt limitations
- Overall debt position
- Impact of the proposed plan on debt position and credit rating
- Impact of the plan on future operating budgets

In my capacity as Director of Administration the safe debt limit I am recommending is a capital-spending plan, net of direct grants and non-general obligation (G.O.) bonds, of \$25 million for Fiscal Year 2018-19. As I indicated in prior years, Fiscal Years 2015-16 and 2016-17 were unique in that we funded two major capital projects—a new inter-district magnet school and a new police headquarters. In line with my recommendation for fiscal year 2017-18, 2018-19 maintains the "new normal" capital spending, resulting from the dramatic increases we experienced as a result of these two large capital projects. My recommendation is supported by the financial projections contained in this report.

#### **INTRODUCTION**

By far, the largest portion of the City of Stamford's net assets reflects its investment in capital assets such as land, buildings, machinery, equipment, and infrastructure. In analyzing the amount of debt that the City may safely incur, a number of factors must be considered. Those factors are identified in this report along with supporting documentation and information.

The capital requests submitted by municipal departments, Board of Education, enterprise fund operations, and outside agencies for next fiscal year were significant, as in recent years. The largest components of these requests were for infrastructure improvements on City roadways/sidewalks/bridges and school construction related to renovation and code compliance issues.

In my safe debt letter two years ago, I noted "...that financing and managing not one, but two significant capital projects along with the customary capital needs of the City is a challenging task – one that is only possible because of the strong financial position of the City. As I have stated repeatedly, I would not recommend anything that I believe would jeopardize the fiscal strength of the City or our credit ratings. To the contrary, I believe that now is the appropriate time for the City to address the critical issues of inequity and overcrowding in our schools and an outdated and deteriorating police department headquarters." With funding for our two largest capital projects largely behind us, we now must return to a more austere capital improvement program.

Debt ratios and metrics are a significant factor in determining the level of debt that is sustainable for a city of our size. However these metrics must be analyzed concurrently with the ability of the citizens to incur any additional tax burden. The rating agencies including Standard & Poor's and Fitch have stated that the City's existing credit rating is AAA/AAA with a stable outlook. In their report dated June 20, 2017, Standard & Poor's highlighted the following:

- The GO rating on Stamford is rated above the sovereign because we believe the city can maintain better credit characteristics than the U.S. in a stress scenario.
- Strong budgetary performance
- Strong management, with "good" financial policies and practices
- Very strong liquidity with total government available cash at 19.1% of total governmental fund expenditures and 2.4x governmental debt service.
- Strong debt and contingent liability profile with net debt that is 63% of total governmental fund revenue and low overall net debt at less than 3% of market value of taxable property.

The report goes on to conclude that the stable outlook reflects Standard & Poor's view of the City's consistent financial performance and economy which is sup ported by strong management.

Taking into consideration the magnitude of our aggregate capital needs along with the debt ratios presented later in this report, I believe the amount recommended is both warranted and fiscally responsible.

#### **UPDATE ON OUR TWO MAJOR CAPITAL PROJECTS**

Progress continues on our new Stamford Police Headquarters project. Most importantly, continual air monitoring of the existing headquarters is ongoing in order to ensure the safest possible conditions for personnel in the building. The Hoyt-Barnum House is now being enjoyed by the community at its new home at 1508 High Ridge Road, adjacent to the Historical Society. Given the immense care and effort put into the restoration process of the Hoyt-Barnum House, we are confident that it will remain listed on the National Park Service's National Register of Historic Places. We have already received a

positive vote in support from the State Historic Preservation Office and are awaiting a final decision from NPS shortly. The construction of the Stamford Police Headquarters is approximately 30% complete. The superstructure for the Police Headquarters including all concrete slabs has been installed with the exception of the lobby steel which began Monday 12/11/17. All MEP trades have started their installation on all floors as well as interior masonry and carpentry. Installation of the roof and exterior insulation started last week. As of today, there are 60 tradesman onsite. As a reminder, the \$60 million for this project has been fully funded and we are confident that we will come in within budget and have an anticipated substantial completion date of December 2018 and an estimated date of occupancy of March 2019.

Strawberry Hill School Phase 2 is currently out to bid. Bids are due back by January 10<sup>th</sup>. Ongoing work continues with the State on securing reimbursement for the project.

#### PROPOSED CAPITAL SPENDING PLAN

## Capital Needs and Financing Plans For Fiscal Year 2018-19 and the subsequent 5 years

City Capital Budget								
Fiscal Year	G.O. Bond <sup>1</sup>							
2018-19	\$25 million							
2019-20	\$25 million							
2020-21	\$30 million							
2021-22	\$30 million							
2022-23	\$30 million							
2023-24	\$30 million							
<sup>1</sup> Net of all grants								

#### Impact on Debt Service:

The impact our proposed financing plans would have on our annual debt service is an important factor to consider and is a major limiting factor in the amount of debt that the City can safely issue. As a rule, I strive to maintain our annual debt service below 10% of the City's annual operating budget. This is necessary for two reasons: First, debt service levels above 10% tend to crowd out other vital operating expenses which could either limit the services the City can adequately provide or force upward pressure on property taxes; and second, rating agencies tend to use 10% as an upward limit for AAA-rated municipalities.

In FY 2017-18 the City's annual debt service was \$52,121,904 or 9.4% of our annual operating budget, below the 10% threshold. In FY 2018-19, our projected debt service is expected to be \$51,147,005 or

8.9% of our projected annual operating budget. For planning purposes, I assume a City (inclusive of the BOE) operating budget increase of 2.5% per year.

#### **Capital Needs of the Community**

As stated previously, the capital needs of the City and BOE are significant. Faced with an aging complement of City buildings and roadways coupled with various amounts of deferred maintenance, the City has seized the opportunity to take advantage of a historically low interest rate environment. Over the past five years, the City has issued \$240 million in long-term new money general obligation bonds to invest in prime areas where immediate attention was paramount and deferred maintenance would only result in higher costs in future years. It was imperative that these investments be made in projects that support the safety and well-being of residents and have a positive impact on the reduction of operating costs. This capital planning improved the quality of our schools and serves to replace a police department building that is conservatively 15 years past its useful life and potentially unsafe in its current form. Equally as important, the City capitalized on this unprecedented period of low interest rates by refunding over \$141 million of general obligation bonds. In aggregate, these refundings led to savings in excess of \$29 million or 20.6% of the bonds refunded. It continues to be our practice to capture these savings equally in each of the remaining term years and in some cases the savings were more heavily weighted in the out years.

#### **Legal Debt Limitations**

The State of Connecticut imposes legal limits on the amount of debt that the City is authorized to issue. Under Connecticut General Statutes, municipalities are not permitted to incur indebtedness through the issuance of bonds that will cause aggregate indebtedness by class to exceed the following:

General Purposes:

School Purposes:

Sewer Purposes:

Urban Renewal Purposes:

Pension Obligation Bonds

Total - All Purposes:

2.25 times annual receipts from taxation

3.75 times annual receipts from taxation

3.25 times annual receipts from taxation

3.00 times annual receipts from taxation

7.00 times annual receipts from taxation

Under these statutory limits, the City is permitted to incur indebtedness of over \$3.5 billion. From a practical standpoint, however, the City could never approach this level of indebtedness. If the City were to incur this magnitude of debt we would surely find our credit rating in the junk bond category. For this reason, the legal debt limit in Connecticut is of no practical consequence for the City of Stamford.

#### **Overall Debt Position**

The City's overall debt position remains quite modest. For purposes of this discussion, the rating agencies look at net debt, meaning they exclude any "self-supporting" debt. Within the City of Stamford, self-supporting debt includes debt for the WPCA, Parking Fund, E.G. Brennan, Marina Fund, Mill River, and most recently the Energy Performance Bonds. As of December 15, 2017, the City's outstanding General Obligation debt (exclusive of interest and self-supporting debt) was approximately \$427 million.

#### Impact of the Proposed Plan on Debt Position and Credit Rating

Stamford is in elite company with an AAA bond rating—the highest available—from Standard & Poor's and Aa1 from Moody's. Of the over 4,000 local governments covered, less than 10% carry an AAA general obligation rating from Standard & Poor's. In assigning credit ratings, the rating agencies analyze four broad rating factors in a community: Economic Factors (wealth levels, tax base, employment, regional economy, etc.); Financial Factors (operating results, financial reserves, contingent obligations, etc.); Administrative Factors (experience of the management team, financial management track record, etc.); and Debt Factors (debt as a percent of full value, per capita debt, debt service as a percent of budget, etc.). The City's capital plan must recognize the importance of debt factors in the evaluation of the City's credit by the rating agencies. Provided below is a comparison of Stamford's ratios with selected cities in Connecticut and with selected other AAA cities in the country.

Debt Ratio Benchmarks

Connecticut Benchmarks: Extracted from State of Connecticut, Fiscal Indicators Report 2016

				(Debt Burden)	Unassigned
	S&P		Debt	Debt to Fair	Fund Balance as %

Winston-Salem, NC	AAA	238,899	576	0.7%	13.3%
Average		179,021	2,427	2.19%	27.39%

While Stamford's per capita debt is above the average for medium sized cities in the State of Connecticut, it is lower than some of the AAA-rated national benchmarks. Stamford is located in a state without county government and where local Board of Education debt is included with the City debt. In many AAA communities, counties take responsibility for sewers and roads on the capital side of the budget and some social service, health, and safety functions as part of their operating budget. In Stamford, all of the funding responsibility is borne by the City. These issues must be taken into consideration when examining the debt per capita ratios.

One of the most important debt ratios for rating agencies is debt as a percentage of fair market value of all taxable property in the municipality. Stamford compares very well in this category. Stamford's average debt to fair market value of 1.5% compares favorably to the 4.0% average within the State and

2.2% average of AAA cities outside the State of Connecticut. Please note that self-supporting funds (funds other than general fund) incur additional capital project authorizations. The project ratios will be mitigated as a portion of the new bonds will be allocated to the self-supporting funds. It is important to note that while no single ratio determines a credit rating, the City's debt burden remains low compared to most other AAA rated communities.

Rainy Day Fund Balance – The last ratio identified is the unassigned fund balance plus the balance assigned for Rainy Day purposes as a percent of operating expenditures. This is not a debt ratio; however, it is a critical financial measure that is used by the rating agencies to gauge the ability of a municipality to react to unexpected financial emergencies or events such as natural disasters or the recent upheaval in the financial markets. In general, the rating agencies expect that AAA credits will maintain this balance in the range of 5-10% of annual expenditures and many of our benchmarks have fund balances well in excess of this range. The City's Charter Revision of 2005 first permitted the City to maintain a general fund "Rainy Day Fund" up to 5% of its annual operating budget. Over the past five years, the City has made a concerted effort to contribute towards our future financial stability and today the current "Rainy Day Fund" balance is \$23 million, roughly 4.1% of the City's 2017-18 operating budget.

#### **Impact of the Plan on Future Operating Budgets**

When approving capital spending plans it is important to realize that this spending results in a direct impact on the City's future operating budgets and tax rates. Not only must future taxpayers fund the original appropriation, but it also must be repaid with interest.

Keeping this in mind, it is very clear that the coming fiscal year will be a challenge. The dramatic increase in structural costs such as pension contributions, insurance costs, and Other Post Employment Benefit (OPEB) liabilities and the erosion of non-tax revenue coupled with slower than ideal growth in the local economy will press the current administration to prepare a fiscally conservative budget with the underlying premise that the taxpayers of the City of Stamford cannot absorb a tax increase of significant proportions.

It is important to note, and for clarification purposes to discuss, the current and following fiscal year debt service contributions from the general fund to the debt service fund. First and foremost, principal and interest payments are made from the debt service fund. The general fund is one source, albeit the primary source, of financing for bonds.

Total Debt Service FY 2017-18 (Current Year): \$52,121,904

Total Debt Service FY 2018-19 (Projected): \$51,147,005

Year-over-year Variance in Debt Service: \$ (974,899)

(See attached)

**Pay-as-you-go Financing** – Financing a portion of the City's capital projects with current revenue is a financially prudent and conservative financing practice. Most AAA credits finance at least a portion of their capital plan through a pay-as-you-go mechanism. In FY 2014-15, the City used \$4.3 million of

cash from Capital Non-Recurring (CNR) to purchase capital items such as vehicles, technology equipment, and software systems. In FY 2015-16 the City used \$4.4 million of cash from CNR towards capital projects and in FY 2016-17 the City used \$6 million. It is anticipated that in FY 2017-18, the City will use approximately \$8 million from CNR. These were major first steps towards increased financial flexibility and a practice that we plan to continue. I have proposed designating \$7 million from last year's operating surplus to go into the CNR fund for projects typically financed with shorter term debt such as police vehicles and technology. By moving away from borrowing for these items, we are reducing our future general fund debt service obligations.

In addition, the City is in the process of completing an Energy Improvement District (EID) project. This project involved LED light conversions in the government center and in 14 of our public schools, as well as a cooling system upgrade at AITE. The total gross cost of the project is approximately \$7 million. After a rebate of \$1.6 million, the net cost is \$5.4 million. It is anticipated that the reduction in utility costs will pay for these projects within 7 years. The short-term debt issued to fund this project is considered self-supported debt as the reduction or avoidance of energy costs will be used to pay the debt service.

#### **CONCLUSION**

In my capacity as Director of Administration the safe debt limit I am recommending is a capital-spending plan, net of direct grants and non-general obligation (G.O.) bonds, of \$25 million for Fiscal Year 2018-19. I trust the information and recommendations provided in this report will assist you in your deliberations regarding the City's future debt position. This proposal is consistent with the long-term strategy outlined in prior years and adequately addresses the vital needs of our vibrant city, while maintaining financial strength and discipline.

Respectfully Submitted,

Michael E. Handler

Director of Administration
