Subject: New Animal Control Center

Thank you for taking the time to agree to be on the task force. I'm sure this is not going to be easy. I've already signed and shared the petition asking to be sure this new Center follows a No Kill Model

This process is all going to take some time to iron out, and to do a good job it should take time; but can we immediately do something to get the remaining dogs off of restriction and get them adopted or at least into foster homes?

It is so unfair to them and unnecessary. As dog lovers we know that any dog, any breed, and any size can have issues. There are so many qualified animal behaviorists that can be called on to help with the adoption process. These poor animals deserve, fresh air, walks, belly rubs and human and canine interaction; let's give these guys a chance at a happy life. They are only with us for such a short time and not one more second of their precious lives should be wasted in a cage.

Stamford deserves a first rate facility we can be proud of where our homeless animals can be safe and well cared for while they await their forever home.

Thank you and best of luck  
Carol J. Frattaroli
